

The Boys & Girls Clubs of the North Valley has been implementing Career Launch, a national curriculum to help teens prepare for employment and careers since 2004. Preparing young people for adulthood and the world of work by developing the skills and competencies necessary in today's world is the top priority of Boys & Girls Clubs of the North Valley.

Since 2014 our Teen Centers have been implementing CREW (Career, Readiness, Empowered, Workforce), an innovative comprehensive countywide program focusing on career exploration and job readiness. Youth develop the needed skills and knowledge to help find, apply and interview for a job; develop appropriate work habits; increase decision-making skills and implement career goals; all while being mentored by a local business professional and building their resumes in a real world career-related experience. Community and business partnerships are an integral component to the success of our work and provide opportunities to educate our youth of local resources they have here in their hometowns.

HELP US PREPARE OUR YOUTH TO STAND OUT IN THE JOB MARKET!

We invite you to become a partner to help build and shape the next generation of your community to be employable and productive members of society and set them on a path to a great future.

THE ULTIMATE GOAL:

To fund the CREW program year-round for youth to gain work experience and build job-related and interpersonal skills that can lead to starting and maintaining employment.

SPONSORSHIPS WILL ENABLE:

Our Clubs to provide CREW, in conjunction with our Career Launch curriculum, to purchase uniforms, birth certificates, social security cards, and CA ID's; to provide transportation and ServSafe testing and certification; and offer incentives, awards and supportive job coaches. See reverse side for ways you can become a sponsor.
